Professional Summary

Senior Flutter Engineer with 4+ years of experience building, scaling, and optimizing production-grade mobile applications for iOS and Android. Proven track record of delivering high-performance apps used by thousands of users, leading teams, designing clean architectures, and automating CI/CD pipelines. Experienced in remote collaboration with cross-functional international teams and focused on delivering reliable, maintainable, and scalable mobile solutions.

Core Technical Skills

Flutter, Dart, Firebase, Supabase, REST & GraphQL APIs, Bloc, Riverpod, Provider, GetX, Clean Architecture, MVVM, SOLID Principles, CI/CD (GitHub Actions, GitLab CI), Unit & Widget Testing, Method Channels, SQLite, Hive, Agile/Scrum, Git (GitHub, GitLab, Bitbucket), App Store & Play Store Deployment

Professional Experience

Senior Software Engineer

Alliance Global (AGBL Group) Dubai, United Arab Emirates

October 2024 – Present

- **Lead Mobile & Cross-Platform Development** Architect and develop scalable mobile applications using Flutter and Dart, ensuring robust performance and seamless user experiences across platforms.
- **Software Architecture & Best Practices** Apply SOLID design principles and design patterns to create clean, modular, and maintainable code architectures that drive long-term project success.
- **Integration & API Management Design** and implement seamless integrations with REST APIs, Firebase, GraphQL, and other third-party services to support dynamic and feature-rich applications.
- **CI/CD & Automation** Establish and maintain continuous integration and continuous delivery (CI/CD) pipelines, promoting rigorous automated testing, deployment, and code quality standards.
- **Mentorship & Code Review** Lead and mentor development teams by conducting thorough code reviews and providing technical guidance, fostering a culture of high-quality coding and continuous improvement.
- **Performance Optimization** Drive efforts to optimize app performance, ensuring fast, responsive, and intuitive user interfaces aligned with modern UI/UX principles.
- **Cloud & DevOps Integration** Utilize cloud functions and version control best practices to streamline backend processes and support efficient, scalable deployments in a SaaS environment.
- **Project Leadership** Oversee projects from conception through to launch, collaborating with cross-functional teams to meet business objectives and adhere to industry standards and best practices.

Software Engineer

Arhamsoft Pvt Ltd Lahore, Pakistan

August 2022 – October 2024

- **Led** technical development projects, overseeing a team of developers to ensure efficient project delivery and maintain high coding standards.
- **Implemented** Agile Scrum methodologies to improve team coordination, resulting in a **20%** increase in project delivery speed.
- **Managed** projects and team tasks using Jira, improving tracking and task management across cross-functional teams.
- **Authored** clean, structured JSON API documentation for backend development, facilitating seamless integration and improved API performance.
- **Conducted** regular code reviews, ensuring adherence to quality and coding standards, reducing bug incidence by **15%**.
- **Optimized** app performance, ensuring top-quality, responsive applications with a focus on user experience.
- **Successfully uploaded** and managed app deployment to the App Store and TestFlight, resulting in streamlined releases.
- **Collaborated** with project managers to provide accurate estimates and regular status updates, reducing project timeline overruns by **10%**.
- **Provided** technical leadership and owned all phases of the development lifecycle, from planning to deployment, ensuring project alignment with business goals.
- **Partnered** closely with cross-functional teams to design and implement innovative features, enhancing user engagement by **25%**.

Assistant Software Engineer

Finjineers Pvt Ltd

November 2021 - August 2022

- **Developed and maintained** cross-platform mobile applications using Flutter for iOS and Android platforms.
- **Worked with Flutter widgets** to create responsive and aesthetically pleasing user interfaces, ensuring smooth and seamless user experiences.
- **Implemented both MVVM and MVC** design patterns to build scalable, testable, and maintainable app architectures, depending on project requirements.
- **Collaborated** with cross-functional teams to define, design, and ship new features, ensuring proper alignment with business goals.
- **Integrated RESTful APIs** to connect apps with back-end services, optimizing data transfer and synchronization.
- **Participated in Agile Scrum** processes and managed project tasks using Trello, streamlining workflows and improving team productivity.
- **Used Git for version control** ensuring efficient collaboration and tracking of development changes.
- **Utilized third-party libraries and plugins** to enhance app functionality and reduce development time.
- **Tested and deployed** mobile applications to Google Play and Apple App Store, ensuring smooth deployment and updates.
- **Assisted senior developers** in debugging and performance optimization of Flutter applications, learning and implementing best practices for app responsiveness and efficiency.
- **Worked on UI components** with custom animations to improve the overall user experience.

Education

Riphah International University

BSSE - 4 Years

2017 - 2021

Achievements

- Completed Mobile App Development (4-months) certification from Techlift (GC-IT) Bootcamp (Aug-2021).
- DAIRA'18 Speed Programming Participant, FAST-NU (CFD Campus).
- AIRTECH'17 Mobile App Designing Competition Participant, Air University Islamabad.
- Riphah speed programming participant Junnon'18.
- Riphah Annual Junnon'18 (FUTSAL Organizer).
- Riphah Annual Olympiad'17 (E-Gaming Head).

Featured Projects

TP Auctions App

- Developed a luxury **auction platform** with a dynamic **bidding system**, expert-verified listings, seamless seller onboarding, and secure payments via **Total Processing**.

<https://play.google.com/store/apps/details?id=com.app.tpauctions>

Precision Wellness App

- Developed a comprehensive **health management platform** featuring **intuitive lab result dashboards**, **GPT-4o-powered AI** wellness guidance, **real-time chat** with care providers, **manual health tracking**, and **wearable integrations** for a **personalized wellness experience**.

<https://play.google.com/store/apps/details?id=com.prcnhealth&hl=en>

HR Connect App

- Developed an **employee management app** with **GPS-based attendance**, **salary tracking**, **tax details**, and **multi-company support** via **tenant ID**.

<https://play.google.com/store/apps/details?id=pk.hrconnect.app>

Vendi Order Booking App

- Developed an **order management app** with **offline support**, **tax calculations**, **daily sync**, and **geo-tagging** for enhanced tracking and performance.

<https://play.google.com/store/apps/details?id=pk.vendi.orderbooker>

Venus App

- Developed a **telehealth app** for **pregnancy care** with **video guides**, **expert consultations**, **AI-powered chat**, and **tiered subscriptions**.

<https://play.google.com/store/apps/details?id=com.finjineer.venus>

Live Packages

PayPal WebView

- Integrated **PayPal v2** APIs for secure transactions, with **sandbox** support for testing and validation.

https://pub.dev/packages/paypal_webview

Animated Pie Chart

- Designed a **dynamic pie chart** with **auto-sorting**, **rotation**, and **highlighted key values** for better visualization and readability.

https://pub.dev/packages/animated_pie_chart

Bounceable Effect

- Developed a package for **custom bouncing animations** with **one-click implementation** and **adjustable speed control**.

https://pub.dev/packages/bounceable_effect

App Feature Implementation

- Firebase (Firestore + Real-time Database + Cloud Messaging + Authentication)
- Firebase (Crashlytics + Analytics)
- Supabase (Database + Storage + Authentication)
- Social Authentication (Google + Facebook + Apple + Phone + Twilio)
- Location-Based Service (Background & Foreground)
- Offline Storage Functionality (Hive & SQLite) Database
- Push Notification Integration (Local & Remote)
- Deep Linking (Universal & App Links)
- Flavors (Production + QA + Staggering Builds)
- Payment Integration (PayPal + Stripe + Google Pay + Apple Pay)
- Real time Chat Module Integration
- Sockets (Socket.IO + Pusher + WebSocket's)
- Terra (Fitness and Health API)
- API Integration (Rest & GraphQL)
- Open Ai (DALL·E 3 + Chat Completions)
- Gemini (Ai Content Search)
- Google AdMob (Banner + Interstitial + Rewarded etc.)
- Camera & Video Functionality
- In-App Purchases
- Chat & Messaging Software
- Maps Integration
- Background Services
- Bridging (Native Modules)
- Pub Dev (Package) Publish
- Third Party Libraries SDK Implementation
